SKILLS

- ❖ HTML & CSS
- ❖ JavaScript
- ❖ React Js
- ❖ GSAP (GreenSock animation platform)
- ❖ Tailwind CSS

PROJECTS

Organic Ecommerce Store – Html, CSS & React Js

This responsive ecommerce store app consists of several pages, including a home page, which serves as the store's portfolio, and three category pages that display products based on their respective categories. Clicking on a product opens a new page with detailed product information. Each category page also features a search functionality for convenient navigation. The project includes a cart section where users can add or remove products and view the total cart amount. Once items are in the cart, users can proceed to the checkout page, where they can fill out a delivery order form. The app then displays a final order message.
